

Our products speak for themselves...

Probotics America

Frequently Asked Questions

Who uses a Probotics robot?

Our robots are used for public outreach, education and commercial promotions by schools, fire departments, hospitals, museums, restaurants, zoos, amusement parks and over 300 law enforcement agencies worldwide. We have designed robots for companies like Walt Disney World – Epcot Center, Bayer Corporation, Toyota of America, SBC Communications and others. A Probotics robot can provide effective communication technology to anyone.

Why use a robot to talk for me rather than just speak myself?

Children are fascinated by our appealing, friendly-looking, non-threatening robots. Because they identify with the Probotics robot and view it as a peer, it is easier to talk about otherwise difficult subjects. Adults are intrigued, amused and entertained. People of all ages are more receptive to the message **you** want to communicate. A Probotics robot is an amazing, interactive, learner-centered, communication tool!

What does the robot say?

Whatever you want to say.

1. You can use a professional, pre-scripted audio program
2. You can create and record your own presentation on the topic of your choice.
3. You can participate in spontaneous ‘live’ conversations utilizing the built-in 2-way wireless sound system.
4. You can use all of the above!

Where are they used?

Probotics robots and their vehicles can be found at entertainment centers, tradeshow, schools, fund raising activities, hospitals, museums, special promotions, science centers, health fairs, training seminars and just about anywhere with a firm surface for the vehicles. Robots can be removed from their vehicle and operate anywhere you can take them.

Is it difficult to operate a Probotics robot?

No special technical skills or experience are necessary to learn to operate a Probotics robot and vehicle. Training instruction is provided and help is only a phone call away.

How long does one last?

If you are concerned about durability, the Probotics robot and vehicle will last for years with minimal maintenance. The rechargeable batteries in both robot and vehicle should provide several years of reliable service. The battery may require recharging after continuous operation for 3 hours.

What about repairs?

We have been designing and manufacturing robots for over 35 years, with proven quality, customer satisfaction and reliability. We provide a full one-year warranty (parts and labor) on all of our robots.

How can I customize a Probotics robot?

Your choices are virtually limitless.

1. You choose a character – human, animal and even alien!
2. You choose a skin color – African-American, Caucasian, Hispanic or Asian.
3. You choose a hair color.
4. You choose an eye color.
5. You choose a vehicle – tricycle, bicycle, motorcycle, fire engine, fire truck (antique or modern), police car, Hummer, tractor, ambulance, wheelchair, Jeep, airplane or stroller.

Probotics robots have easily interchangeable heads and hands and wear standard size 6-7 children's clothing, making it possible to quickly adapt to enhance identification with your target audience or for seasonal changes.

New designs and special requests expand your options even further.

What is included with the purchase of a Probotics robot?

All of our robots include audio-synchronized mouth movement, wireless remote control operation, a head that rotates up/down and left/right, an MP3 player, a 2-way sound system to enable you to speak and listen through the robot, rechargeable batteries for transmitter and robot, interchangeable heads and hands, an instruction booklet, a padded equipment case and a full one-year warranty.

Vehicles can move forward and reverse, at variable speeds and have proportional steering. Tricycles and bicycles have realistic pedaling movement. Flashing lights, sirens, water squirter, built-in LCD TV and DVD player, voice modifier, propeller movement and headlights are available on select vehicles. Robots can be removed from their vehicles and operate separately.

Can I rent or lease a robot?

We do have robots, including our BandBots, available for rent or lease. Call or check www.robotalent.com for more information.

How much do they cost?

Prices vary depending on your selection, ranging from \$900 to \$11,800. Options such as an extra head unit to provide a quick change of character (\$425) are additional.

How do I order one?

Give us a call at 972-231-7744 and we can answer any questions you might have and can help you design your ideal Probotics robot. If you call now, you can request a no-obligation price quote to lock-in prices for six months.
