With the technology available these days, it's a challenge to get people's attention...

But you can send your message with something they've never seen before -

A high-tech, mobile, interactive robot

Interactive!
Live!
Unique!

Be Remembered!

Robots make your message memorable!

The Mechanical Man will make your public events unique and memorable. He can show your videos, photos or presentations from

a giant DVD/TV built into his chest and augment them with his flashing lights. Sound is loud and clear with dual waist-mounted speakers and a powerful amplifier. Best of all, remove a plug, a pin and the head to make your five foot tall Mechanical Man come apart for transportation in your car—no dedicated trailer or van required!

Mechanical Man Features

Three-piece robot

- Easily split into 3 pieces for easier handling
